Lived and worked in Dubai, UAE (2021-2022) as an independent entrepreneur. Open to relocation: UAE, Qatar, Saudi Arabia, Germany, Netherlands, Canada, USA. Also open to remote.

PROFILE

I write, produce, edit and render long-form YouTube documentaries with AI voice-over and short-form video, using code and AI tools to do work that normally needs a full editing team. My videos are built in Remotion (React), timed to the voice-over word by word, and fact-checked before recording. I also build the automation around the content: a pipeline that produces a news Short every morning and uploads it as a private draft for my approval. I come from eight years of marketing and community work, so I write for an audience first and choose the tools second.

VIDEO WORK

Crypto investigation documentaries (16:9, faceless and AI-host formats) Oct - Nov 2026

- *The $6.3 Billion Binance Heist* (22:50) with three Shorts; *Binance: The $6.3 Billion Inside Job*, Parts 1 and 2 (11:39 and 12:34); *The Billion-Dollar Lie* (20:24, AI-generated host); *Memecoin Rug Pulls* (6:52) with four Shorts.
- Fact-checked every script before voicing. In one script the check caught an unsourced dollar figure and a finding credited to a news outlet that could not be verified; both were corrected, and the finding re-credited to the primary sources, before voicing.
- Built a cue system that finds each spoken phrase in a whisper.cpp transcript, so scenes re-time automatically when the voice-over speed changes.
- Rendered 20-minute films on an 8 GB laptop with resumable chunked renders, then muxed audio and soft subtitles. Inside Job masters delivered at 1080p30, 40 Mbps CBR, with audio peaks held below -1 dBFS.

The Pruned Path (YouTube channel, faith and motivation) Nov 2026 - present

- Produced five long-form videos (two teachings of 35 and 43 minutes, three 10-minute speeches) in the first week, uploaded privately for review. Built separate pipelines for teachings, speeches and compilations.
- Pipeline: script chunking, AI voice (ElevenLabs voices and local Kokoro TTS), AI still images, open-source music (ACE-Step), timeline build, render, thumbnail, and upload through the YouTube API.
- Set the channel branding, descriptions, keywords and playlists by script through the YouTube Data API.

Automated daily news Shorts (PulseX Files channel) Nov 2026 - present

- Every morning at 06:00 a scheduled job pulls crypto news, has an AI agent write the episode and voice-over, renders the Short, runs an AI quality review, emails it for approval, and uploads it as a private draft.

Product and promo video Oct - Nov 2026

- Edited a 15-minute screen-recording walkthrough of my trading software with Remotion overlays, captions, music, three cut-down Shorts and an upload pack.
- Made a 47-second vertical promo with an AI host for a vehicle-investment product.

EXPERIENCE

Independent Content Producer and AI Automation Engineer 2026 - present

Self-employed, Abuja (remote)

- Video production and the software behind it, as listed above. Also built AI agents and trading research software in Python and TypeScript.

Head of Marketing, PerfectRide Jan 2025 - present

Hybrid, Canada and Nigeria (perfectride.io, vehicle business investment platform)

- Lead marketing for the platform, including a 47-second vertical promo video with an AI host for the STAKE product.

Sales and Marketing Manager, Cladex Feb 2026 - present

Part-time, Nigeria (multichain crypto platform)

- Marketing strategy and sales for a multichain crypto platform.

Marketing Manager, NiMEDix Ecosystems Technologies Ltd Jan 2018 - present

Abuja, Nigeria (hybrid)

- Marketing strategy and blockchain analysis for a health-technology and blockchain company.

Creator, MOONSIGNAL

- Crypto education and investment community.

EDUCATION

Ordinary National Diploma (OND), Mass Communication, Federal Polytechnic Bida, Nigeria

CERTIFICATIONS

AI Fluency: Framework and Foundations, Anthropic (July 2026)
Claude Code 101, Anthropic (July 2026)

SKILLS
